It is stated by the health officers that there is but one case of smallpox in the State, and that is at Aurora. Scarlet fever and diphtheria are very prevalent.

City Directory.

The new City Directory for 1885 is announced ready for delivery by the enterprising publishers, R. L. Polk &amp; Co. This epitome of the city's growth and advancement grows gratifyingly larger year by year. From the prices to this last volume we learn that the directory contains nearly 40,000 names, including Brightwood, North Indianapolis, Irvington, Belmont, Mount Jackson and Haughville. This shows a decided increase over last year, notwithstanding the depression in business circles under which our city has labored during the past few months. The city of Indianapolis has a world-wide reputation as a railroad center,

and is rapidly growing in favor as a manufacturing point, it being unequalled as a distributing center. In the compilation of this edition nothing that experience could suggest has been neglected to make it as accurate as possible.

The publishers call attention to a new feature this year. They have added the number and street where each person is regularly employed, as well as the number where each one keeps house or has a place of business. This new feature makes this portion of the book a double directory. The general business of the city, in spite of the disquieting times experienced during the past year, has remained in a healthy state, and the publishers would thank the business public for a patronage not decreased by the rumors and uncertainties of the day.

Bertie Short at Lafayette—Handsomeness Presentation.

Master Bertie Short, the popular little skater, who is so well known to patrons of Indianapolis rinks, went to Lafayette last Thursday to spend a couple of weeks with friends. When in Lafayette three or four weeks ago Bertie gave an exhibition of fancy skating at the Palace Rink in the presence of about 1,000 people. So well pleased were they with the exhibition that the manager of the rink finally induced Bertie, upon his re-appearance in that city, to again entertain them, which the little "wonder on wheels" consented to do; so arrangements were made, and he accordingly appeared Thursday, Friday and Saturday nights. The Lafayette papers say that the three exhibitions were witnessed by as many people as could possibly crowd into this large rink, and that his skating far surpassed anything of the kind ever witnessed there.

At the conclusion of Bertie's exhibition, Friday evening, the manager of the rink presented him with a gold badge, set with diamonds. It was made by Tiffany, of New York City, and is the most elegant badge ever presented to a professional skater.

A Monstrosity.

Fletcher M. Noe, the taxidermist, yesterday received a curious monstrosity, which had been found at a slaughter house near the city. The object is round, about fourteen inches in diameter, and is covered with red hair one and a half inches long. In the center of it is a perfect squirrel's head and neck with eyes, mouth and ears in a very perfect state. The specimen is rendered more curious by its having been connected to something by a naval cord. Mr. Noe has made a careful dissection of the specimen, and finds that while it contains heart, lungs and stomach, there is no connection between them and the head. It also contains no bones whatever, being composed entirely of flesh. The specimen will be given to the State Museum when properly prepared.

Dramatic and Elocution Committee—Mrs. Fattie Frank, Mrs. Bailey, Mr. Miller, Miss Carrie Gail, Colonel Black, A. H. Brown, Dr. C. E. Wright.

The tableaux and Elocution Committee is requested to meet at Mrs. Frank's, 365 West New York street, Tuesday evening, and the Committee on Music will meet on Wednesday morning at 10 o'clock at Mrs. Miller's, 282 North Pennsylvania street.

A Train Wreck.

The Bee Line train, No. 3, due here from Cleveland at 6 o'clock last night, ran into freight train at New London, O., about 2:30 o'clock in the afternoon, and had a narrow escape from total demolition by fire. Just how the accident occurred was not learned, but the collision seems to have been severe. The engineer and fireman of the passenger train were both badly hurt. Their names could not be learned. The mail and baggage cars were considerably bruised and broken both left the track and both took fire. By hard work they were dragged out, except for the engine, of both trains laboring to that end, and after considerable difficulty the fire was put out. The passengers were uninjured, except for the fact that they were shaken up in the collision, but some of them narrowly escaped being scorched by the fire.

The Trouble Explained.

At the request of Dr. W. B. Fletcher we examined the pumps and pumping machinery at the Hospital for the Insane. We found the pumps in good order and at slow speed working satisfactorily. Each pump was then speeded up, and in no case would any pump continue to draw water when running at one-third its maximum

speed. The No. 3 Dean Duplex Pump would not pump at a higher speed than fifteen strokes per minute, though Mr. Dean stated that with sufficient water supply it should run 200. It is our opinion that the pumps failed to get a sufficient supply of water.

Science or Miracles, Which?

The success which has attended Dr. F. A. Smith, the wonderful magnetist, during the two years of his practice in this city is simply marvelous. Literally, the blind have been made to see and the lame to walk. Rheumatics who have suffered for years have gone to him on crutches and come away completely cured. The doctor has been restored to deaf people, and a number of diseases have been successfully treated by him. During the past week, in Vajen's Hall, 66 1/2 North Pennsylvania street, he has been giving free public treatments to the poor of the city, and many of the cures there wrought by him border on the miraculous. Nightly persons who have suffered excruciating pain for months and years leave the hall sound and well, thanking the doctor with tears in their eyes for the good he has done them. These treatments will continue at the same place nightly, Sundays excepted, from 7 to 8 o'clock, until February 23, and all who doubt the efficacy of the treatment can go and determine for themselves the truth of the assertions above made. The doctor cannot be too highly commended for his charitable and philanthropic work. His office is located in Room No. 3, Vajen's Block, 66 1/2 North Pennsylvania street, where he has successfully treated hundreds of the citizens of Indianapolis, any of whom will bear testimony in his behalf.
